

Description

Monograde lubricant oil suitable for naturally aspirated diesel engines and some petrol engines operating at moderate level. Its formulation of highly refined paraffin bases with carefully selected additives provides the highest level of performance in its category

Properties

- This high detergent and dispersing oil ensures thorough cleaning of the engine's internal parts, avoiding the formation of dirt and mud when cold.
- Due to its alkaline reserve level (TBN), it neutralizes the acids that form in the combustion of fuel with different sulphur content, thus protecting the engine against corrosion.
- Low oil consumption, due to its formulation with low volatile bases.

Quality levels, approvals and recommendations

- API CD/SD

Technical specifications

	UNIT	METHOD	VALUE
SAE Grade			50
Density at 15 °C	g/mL	ASTM D 4052	0.902
Viscosity at 100 °C	cSt	ASTM D 445	19.1
Viscosity at 40 °C	cSt	ASTM D 445	225
Viscosity index	-	ASTM D 2270	>95
Flash point, open cup	°C	ASTM D 92	>235
Pour point	°C	ASTM D 97	-21
T.B.N.	mg KOH/g	ASTM D 2896	7.8

The above mentioned characteristics are typical values and should not be considered product specifications.
