

## Description

Monograde lubricant manufactured from highly-refined base oils used for boat, locomotive and lorry diesel engines and for energy generation. It is also suitable for turbocharged or naturally aspirated diesel engines operating under extreme conditions. It is recommended for lubricating engines that require MTU Type 2 quality or the Caterpillar CMOT test.

## Properties

- Guarantees good lubrication in extreme service conditions.
- Very good antioxidant and antiwear properties due to the additives used.
- Extremely effective detergent-dispersant, preventing the formation of deposits and sludge.
- Maximum protection against corrosion of the different engine parts, even in saline environments.
- Excellent for joints and elastomers, guaranteeing better compatibility with the various parts of the hydraulic systems.

## Quality levels, approvals and recommendations

- API CF
- CATERPILLAR Microoxidation test
- MAN 270
- MB 228.0
- MTU Type 2\*
- \*Formal approval
