

## **NAVIGATOR TO-4**

## **Description**

Lubricant oil specially formulated to meet the requirements of CATERPILLAR, ALLISON and KOMATSU specifications, applicable to power-shift transmissions, clutches and brakes, as well as end controls, crowns and differentials (depending on SAE grade). May also be used in some special hydraulic applications, as is the case with the SAE 10W grade.

## **Properties**

Prevents transmission slippage. Great capacity for supporting loads and anti-wear properties. Increased useful life of the clutch discs and smooth operating of the brakes. Enables greater dragging and start-up force in machines. Compatibility with gaskets. Excellent anti-corrosive properties. Cannot be used as motor oil.
