

Description

Aerosol format lubricant oil to keep chains and secondary transmissions in perfect condition. It is easily applied and adheres perfectly to the chain, thus minimising losses and keeping tyres and the rear rim clean. It is water resistant and capable of working at high temperatures and in all kinds of environments.

Properties

- Excellent load-carrying capacity, antiwear and anticorrosive properties.
- Good oiliness that improves adherence to the transmission chain and keeps the wheel clean.
- Excellent friction coefficient thanks to its Teflon content.
- Increases the lifespan of the chain.
- Water-resistant, maintains its properties in wet environments.

Technical specifications

	UNIT	METHOD	VALUE
Colour	-	Visual	Yellowish
4 Ball wear, print diameter (1 min/80 kg)	mm	DIN 51530	0.37
4 Ball wear, print diameter (40 kg)	mm	ASTM D2266	0.35
Corrosion Cu, 3hrs 100 °C	-	ASTM D130	1 a

The above mentioned characteristics are typical values and should not be considered product specifications.
