

## Description

Four strokes engine lubricant developed to meet the requirements of the most relevant motorcycle manufacturers. Especially recommended for scooters with dry clutch automatic transmissions. Its friction modifier additive allows the product to attain the requirements of JASO MB. Its formulation with low friction capability helps to reduce fuel consumption and optimize the power output of the engine.

## Properties

- Superior protection for engine against wear and deposit formation.
- Strong durability, cleanliness and thermal reliability, improving the engine's life.
- Outstanding low friction performance which helps to increase fuel efficiency.
- Reduces the deposits on the spark plug and prevents the piston rings from sticking.

## Quality levels, approvals and recommendations

• API SL

• JASO JASO: MB\*

\*Formal approval

## Technical specifications

	UNIT	METHOD	VALUE
Density at 15 °C	g/cm <sup>3</sup>	ASTM D4052	0.880
Kinematic viscosity at 100 °C	cSt	ASTM D445	10.5
Viscosity index	-	ASTM D2270	112
Flash point, closed cup	°C	ASTM D93	>200
Pour point	°C	ASTM D97	-27
TBN	mg KOH/g	ASTM D2896	5.7

The above mentioned characteristics are typical values and should not be considered product specifications.
