

## GUARD AGUA DESTILADA DESIONIZADA / DISTILLED DEIONIZED WATER

## **Description**

Demineralized and deionized water, obtained through filtration, reverse osmosis, electrodeionization and UVC radiation processes. Although, for historical reasons, this product is commonly known as distilled water, it does not follow a distillation process. Nevertheless, the resulting product has the same quality.

This product is suitable for use in vehicle batteries, in home appliances such as irons or humidifiers, and in most industrial applications where standard demineralized and deionized water is required.

## **Technical specifications**

	UNIT	METHOD	VALUE
Appearance	-	Visual	Colorless liquid
Density at 20 °C	g/cm3	ASTM D4052	0.995
рН	-	ASTM E70	7
Conductivity		-	2.5
Hardness	mg/L de CaCO3	-	0.3
Silica	-	mg/L	0.003

The above mentioned characteristics are typical values and should not be considered product specifications.
