

# GUARD REFRIGERANTE 30 % / GUARD COOLANT 30 %

## Description

Antifreeze formulated from ethylene glycol and anticorrosive and anti-foam additives. Amine and nitrate free, recommended for all types of diesel and petrol engine cooling circuits. Especially for aluminium and aluminium alloy circuits. Offers good antifreeze, coolant and metal surface protection properties.

## Properties

- Product designed for direct consumption as it contains water processed to avoid the risk of limescale deposit formation, corrosion and foam formation.
- Good thermal stability and prevents deposits and sludges forming in the cooling circuit.
- Compatible with joints and seals, thus preventing fluid loss risks.

## Quality levels, approvals and recommendations

- ASTM: D 3306/D 4985
- UNE: 26-361-88

## Technical specifications

	UNIT	METHOD	VALUE
Concentration			30%
Colour	-	Visual	Green
Active ingredient	% in weight	-	30
Density at 20 °C	g/cm <sup>3</sup>	ASTM D5931	1.044
Freezing point	°C	-	-18

The above mentioned characteristics are typical values and should not be considered product specifications.
