

RP TALUSIA HD 40

Description

Marine lubricant specially formulated for lubricating 2-stroke crosshead low-speed diesel engine cylinders, including the latest generation of engines running on low sulfur fuels (up to 0.5%).

RP TALUSIA HD 40 is a cylinder lubricant specifically formulated for demanding applications where a greater level of detergency is required.

Properties

- Minimal wear of the sleeve and piston rings.
- Maximum cleaning.
- Reduces engine maintenance costs.
- Longer time between services.
- Engines running on low sulfur fuels that require a BN 40 lubricant conforming to the MAN ES Category II specification.

Quality levels, approvals and recommendations

- MAN ES (MAN B&W) Cat. II* *Formal approval

Technical specifications

The above mentioned characteristics are typical values and should not be considered product specifications.
